Enthusiastic Frontend Developer dedicated to creating user-friendly web interfaces. I am eager to apply my knowledge and skills to real-world projects. I am seeking a challenging and dynamic environment that encourages continuous growth, where I can apply my skills, embrace new challenges, and grow as a frontend developer. Eager to collaborate on projects that enhance the digital presence of company/ organization while expanding my skills in the field of Frontend Development.

PROJECTS

E-Commerce Website

The project was built using React.js for the frontend, Context API, Firebase for the backend.

- HTML, CSS, JS, ReactJS, Context API, Firebase
- It features a responsive design, product listings with details, and a shopping cart. The site includes lazy loading and suspense for optimal performance.
- <https://github.com/Dolly62/Ecommerce-Website.git>

Expense Tracker

The project was built using React.js for the frontend, Redux for state management, and Firebase for the Real-time data storage.

- HTML, Bootstrap, JS, ReactJS, Redux, Firebase
- Implemented features such as expense management in which user can add, edit, delete expense, custom categories, profile completion, dark/light theme toggle, and data download. Achieved a responsive and user-friendly interface.
- <https://github.com/Dolly62/X-expense-tracker.git>

MailBox Client

The project was built using React.js for the frontend, Redux for state management, Firebase for the backend.

- HTML, CSS, JS, ReactJS, Redux, Firebase
- Users can compose, send, receive, and manage emails, including features like inbox and sent box.
- <https://github.com/Dolly62/MailBox.git>
